EDUCATION

Carnegie Mellon University (CMU)

Master of Science, Computer Science and Information Systems

Courses: Cloud Computing, Database Management Systems, Distributed Systems, Object-Oriented Programming in Java, Statistics

Pittsburgh, PA

Aug 2025 – Dec 2026

Birla Institute of Technology and Science, Pilani (BITS Pilani)

Bachelor of Engineering (Hons.), Electronics and Communication

Minor, Robotics and Automation

Courses: Data Structures and Algorithms, Operating Systems, AI for Robotics, Digital Image Processing

Hyderabad, India

Aug 2019 – May 2023

SKILLS

Programming: Java, JavaScript, TypeScript, Python, C, C++, MATLAB, HTML/HTML5, CSS, Swift, Golang, Scala

Databases & Tools: MongoDB, MySQL, Redis, Git, Docker, Jenkins, AWS, Azure, Google Cloud, Swagger, Kubernetes (K8s), Hadoop

Frameworks & Methodologies: Angular, Spring Boot, React, Flutter, Express.js, Node.js, FastAPI, Web3, Ethereum, Truffle, Figma

PROFESSIONAL EXPERIENCE

Carnegie Mellon University

Research and Teaching Assistant, *Agentic AI in Practice*

- Mentoring 30+ students in designing RAG pipelines and multi-step agentic workflows using LLMs and vector databases
- Built a multi-agent public policy lab with five specialized agents for policy analysis, recommendation, and risk mitigation

Pittsburgh, PA

Mar 2026 – Present

Biz2Credit

Software Engineer

- Biz2X Rules Engine:** Designed and developed configurable rule-based automation platform (Spring Boot, Angular, MongoDB) for complex banking workflows, decreasing client onboarding time by 65% (90 → 30 days)
- Metadata Service:** Built centralized service managing system-wide attributes, business parameters, and UI configs for 200K+ SMEs
- Reusable Architecture:** Designed shared UI components and microservices, boosting development and delivery efficiency by 30%
- Platform Integration:** Enabled real-time credit decisioning at scale by integrating Rules Engine and Metadata Service across client platforms, processing 10M+ API requests and 2M+ rule evaluations daily
- Engineering Leadership:** Led a team of 5+ engineers in full-stack feature development, automating 20+ loan workflows and AI enhancements (Gemini Flash 2.5-powered chatbot), driving 25% revenue growth
- AI Document Parser:** Productionized GCP Document AI-based parser — 99% accuracy, 90% less manual entry, \$30K/quarter savings
- AI Automation & Product Delivery:** Delivered automation solutions to 15+ global fintech clients — including a recommendation system and AI assistant — supporting marketplace and SaaS divisions facilitating \$10B and \$8B in loan disbursements respectively
- Testing & Optimization:** Achieved 100% unit test coverage, implemented Jenkins CI/CD pipelines, and optimized MongoDB queries using aggregation pipelines and indexing

Noida, India

Jul 2022 – Aug 2025

PROJECTS

File2Form AI, AI-Driven Troubleshooting and Diagnostics System | Founder, Hacking for Defense Program

- Built a multimodal RAG assistant for field mechanics in NATO and the U.S. Army, linking technical manuals and fault symptoms to components via NSN lookup and saving thousands of man-hours
- Designed a dual-mode system combining semantic search with a 3-agent workflow for autonomous fault diagnosis
- Implemented offline capability using quantized open-source models for on-device query processing

End-to-End Retrieval Augmented Generation (RAG) Q&A System | LangChain, ChromaDB, BM25, Cohere, Ragas, Langfuse

- Engineered a domain-specific hybrid RAG pipeline (BM25 + vector) with cross-encoder reranking and strict citation enforcement
- Instrumented end-to-end observability, tracing retrieved chunks, reranker reorderings, cost, token usage, accuracy, and latency
- Integrated a CI-gated evaluation pipeline using Ragas with a 50–200 Q&A golden dataset, failing builds on faithfulness regression

LEADERSHIP, AWARDS AND ACTIVITIES

- Winner, **Biz2X AI Hackathon 2025** (\$1500): Built and productionized an AI-powered Document Parser
- Runners-up, **Biz2X Hackathon 2024** (\$500): Developed and continued enhancing a Tax Statement Analyzer post-event
- 5th Place, **TartanHacks 2026**: Built an XRPL developer platform with wallet & smart escrow simulations and AI code generator
- Recipient, **Biz2X Star of the Month Award, 2 Functional Awards** – For client delivery, collaboration, and platform innovation
- Mentor, **Desh Ke Mentor** – Volunteered as a mentor, guiding students in STEM career paths
- Core Member, **The Wall Street Club, BITS Pilani** – Engaged in discussions on markets, economics, and global trends
